

**Tip and Top**

In an Aeroplane

Vojtěch Kubašta

Vojtěch Kubašta

**A** helicopter is a hugely important machine, and as it saves human lives, we're lucky to have it. It can manage the trickiest situations. A helicopter like this can land just as easily on top of a mountain as on a pavement. "Yes indeed . . . but look sharp and lend a hand! My kite is in trouble!"

**W**e've come back down to Earth. Now we're in the control tower. Clocks, meters, gauges and dials – precision is crucial. The controller watches the readings on the instruments and gives instructions to the pilots. "It's thanks to him that we were able to travel the skies safely, Top." The sun has gone and the stars are here – it's time for bed. So see you next time! With or without wings . . .

# Tip & Top In an Aeroplane

Birds are not the only expert flyers: balloons, fighter planes and gliders can all give them a run for their money. Tip and Top are brave lads who want to try for themselves what it's like to pilot a plane. This thrilling book, set high above our heads, is by celebrated Czech artist Vojtěch Kubašta, whose innovative pop-ups have given inspiration to paper engineers all over the world! If you, too, long to fly, what are you waiting for? We're about to take off.

Have fun  
with pop-up
