Phwoar!

This plane is capable of vertical take-off, too.

Propeller-driven aeroplane

Jet aeroplane

Military fighter plane, which can make itself invisible.

splash!

Me too!

A seaplane is able to land on water.

Helicopters

A transport helicopter can carry heavy loads.

A modern military helicopter

A rescue helicopter transports injured people to hospital.

Wonderful world of AIRPLANES

Book in the shape of bigplane model will introduce the world of aviation – from its history till the present days – to the youngest readers in a very simple and illustrative way. A reader discovers how planes looked like 100 years ago, who was the first aviation pioneer, what are airplanes used for today and how they look like. Children will also find out how the airport looks like, what are helicopters used for or how the cockpit of big transport aircraft looks like.
