Matching outfits

Baby sloths hold onto their mom's fur for so long, they actually look like it. Their coats always match.

Step by step

Sloths don't like to move around much. And even when they do, they're slooow. That's why it's so hard to see them up in the trees.

SLOTHS

Sleepyheads

Sloths like to sleep a lot. They curl up and become invisible.

I need to pee

They are vulnerable on the ground, so they only come down to pee. It's better to stay up above – leopards can't get them up there!

New clothes

Why a sloth changes its coat? It's because of a plant that grows in its fur. When it's dry outside, it stays brown but when it rains, it turns green.

WHO'S HIDING IN THE FOREST AND SNOW?

Written by Pavla Hanáčková

Illustrated by Linh Dao

Everybody wears the coat that best suits them. Have you noticed that animals can be almost invisible when they blend into their environment? It's because nature has taught them how to camouflage. In the forest, rainforest, Arctic or pond you can find creatures who are unbeatable at hide-and-seek. Let's see if you can find all of them!
