MALGORZATA DETNER

FOUR LITTLE KITTENS

Momo has just given birth to four little babies! She needs strength to feed them milk. Give her three full bowls of cat food and stick her kittens in the cozy bed.

When a cat brushes against your leg, it's telling you that you belong to it!

SEE HOW FAST THE CAT GROWS:

Week 1 – The kitten sleeps and drinks its mother's milk.

Week 2 – The kitten opens its eyes.

Week 3 – The kitten takes its first steps.

Week 6 – The kitten plays with its kitten siblings.

Week 13 – The kitten is ready to find a new home.

Months 12 to 15 – The baby kitten becomes an adult cat!

WHAT DO CATS DO AT NIGHT?

It's past midnight and everyone is asleep, but our cats are just getting started! Stick the stickers and see what mischief they're up to during their nightly antics.

Cats can see very well in the dark.

PLAYING WITH CATS

Our cats have a new playroom – a full jungle gym from floor to ceiling, with ropes, climbing poles, and all kinds of cat toys.

Cats' tails help them keep their balance.

They can sharpen their claws on the scratching post.

CAT BODY LANGUAGE

Take a look at the kitties' postures and movements. What are they trying to say? How are they feeling?
